Towel Warmers 2026

Leader of towel warmers

# About Us

For over 7 years, we have embodied excellence in towel warmers across the United States.

## America's Trusted Industry Leader

As the undisputed leader in the American market, our company has become the trusted reference for architects, interior designers, developers, and the most demanding industry professionals.

## A Network of 80,000+ Professionals

We actively collaborate with over 80,000 professionals across the United States, building long-term partnerships grounded in trust, performance, and excellence.

## Shaping Prestigious Projects Nationwide

With more than 250 thousands installed, our expertise shapes some of the most prestigious residential and commercial projects nationwide.

We also serve luxury professionals internationally, notably in Europe and across various countries in Asia.

## Largest Towel Warmer Inventory in the U.S.

Our exclusive collection features over 100 models available for immediate delivery, supported by the largest towel warmer inventory in the United States. This exceptional logistical strength allows us to deliver speed, reliability, and consistency for projects of any scale.

Each towel warmer reflects rigorous craftsmanship, combining cutting-edge technology, precision engineering, and refined contemporary design.

**We create pieces that do more than illuminate a space — they elevate it**

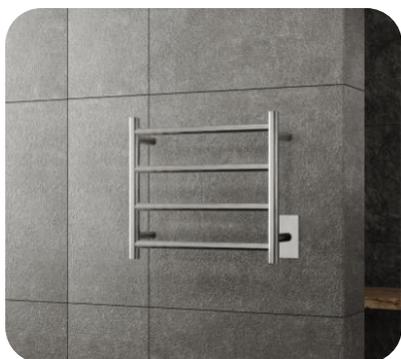

Our standards are uncompromising.  
Our signature is distinctive.  
Our leadership is established.

63" x 19.74" x 1.6"	425 BTU	500 Watts

- ETL tested and compliant
- Hardwired connection (120 VAC) eliminates visible wires
- Integrated on/off switch with indicator light
- Max Surface Temp: Between 90 - 110 F

## Color Options

Black	Chrome	Gold
-------	--------	------

# Hemera

Designed for high-end residential and hospitality project, this heated rail features a stepped-bar geometry that optimizes thermal output within a compact footprint. It provides a durable, high-performance solution for modern bathroom projects, available in polished chrome or matte black to complement any architectural palette.

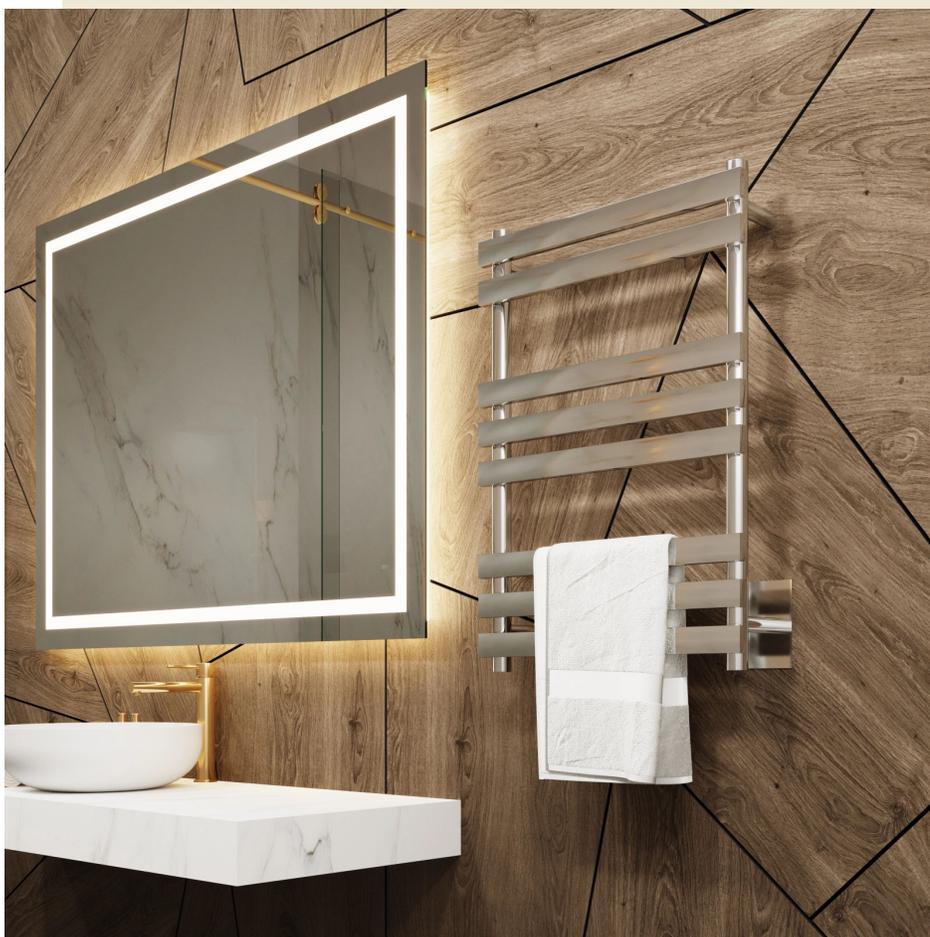

## Specifications

Dimensions	Heat Output	Power Requirement
29" x 21" x 5"	273 BTU	95 Watts

- ETL tested and compliant
- Hardwired connection (120 VAC) eliminates visible wires
- Integrated on/off switch with indicator light
- Max Surface Temp: Between 90 - 110 F

## Color Options

Black	Chrome
-------	--------

# Leto 6

This professional-grade heated rail features a cantilevered, six-bar configuration designed for maximum utility and architectural impact. Engineered for high-end hospitality and residential projects, the Leto 6 offers efficient thermal performance with a streamlined, modern profile. It is available in black, chrome, or gold to integrate seamlessly into curated interior palettes.

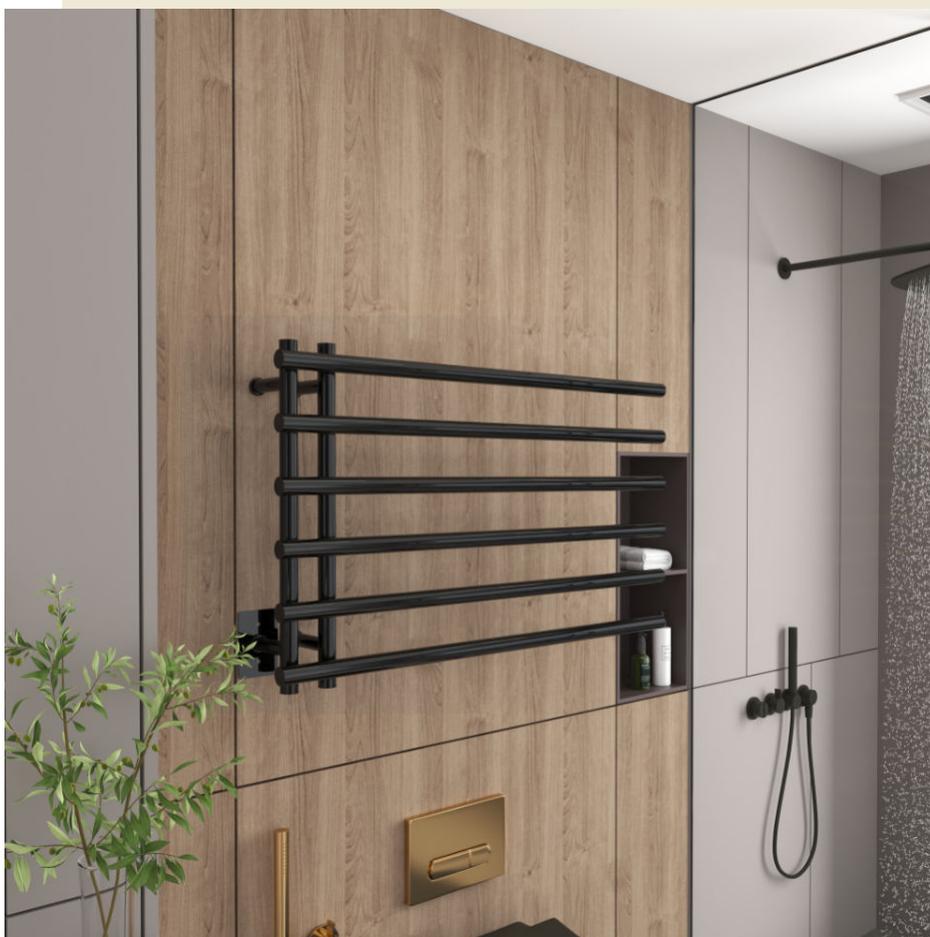

# Specifications

Dimensions	Heat Output	Power Requirement
24" x 39" x 6"	614 BTU	180 Watts

- ETL tested and compliant
- Hardwired connection (120 VAC) eliminates visible wires
- Integrated on/off switch with indicator light
- Max Surface Temp: Between 90 - 110 F

# Color Options

Black	Chrome	Gold
-------	--------	------

# Leto 8

The Leto 8 expands on the series' signature cantilevered design, utilizing an eight-bar configuration to increase both towel capacity and thermal output. Engineered for high-traffic hospitality and premium residential suites, this high-performance rail provides a clean, architectural statement in black, chrome, or gold.

# Specifications

Dimensions	Heat Output	Power Requirement
24" x 39" x 6"	614 BTU	180 Watts

- ETL tested and compliant
- Hardwired connection (120 VAC) eliminates visible wires
- Integrated on/off switch with indicator light
- Max Surface Temp: Between 90 - 110 F

# Color Options

Black	Chrome	Gold
-------	--------	------

# Leto 13

The Leto 13 provides maximum scale and thermal coverage, utilizing a high-density thirteen-bar configuration for superior towel capacity. Designed as a functional focal point for expansive master suites and luxury commercial projects, it maintains a refined, architectural profile in black, chrome, or gold.

# Specifications

Dimensions	Heat Output	Power Requirement
55" x 24" x 6"	1023 BTU	300 Watts

- ETL tested and compliant
- Hardwired connection (120 VAC) eliminates visible wires
- Integrated on/off switch with indicator light
- Max Surface Temp: Between 90 - 110 F

# Color Options

Black	Chrome	Gold
-------	--------	------

# Metis

The Metis distinguishes itself with a bold, continuous serpentine geometry, offering a high-impact architectural alternative to traditional rungs. Engineered for modern specifications, its square-profile design maximizes surface contact for efficient heating while serving as a sculptural element in the bathroom. This model is available in black, chrome, or gold to suit diverse design palettes.

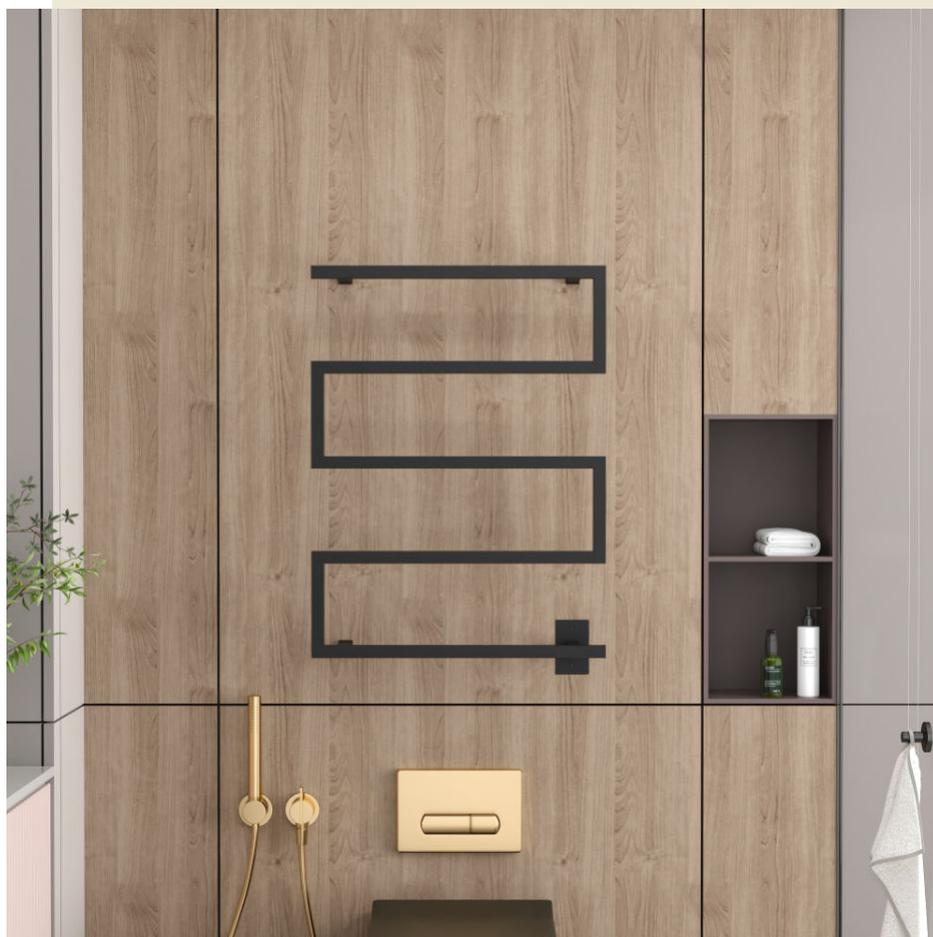

## Specifications

Dimensions	Heat Output	Power Requirement
32" x 24" x 5"	340 BTU	100 Watts

- ETL tested and compliant
- Hardwired connection (120 VAC) eliminates visible wires
- Integrated on/off switch with indicator light
- Max Surface Temp: Between 90 - 110 F

## Color Options

Black	Chrome	Gold
-------	--------	------

# Minos

The Minos features a striking rhythmic profile, utilizing layered horizontal planes to create a bold, modern aesthetic with high thermal utility. Designed for premium architectural specifications, its wide-surface rungs ensure rapid drying and consistent warmth. This model is available in black, chrome, or gun metal to complement sophisticated, contemporary bath suites.

## Specifications

Dimensions	Heat Output	Power Requirement
47.6" x 19.69" x 2.44"	500 BTU	500 Watts

- ETL tested and compliant
- Hardwired connection (120 VAC) eliminates visible wires
- Max Surface Temp: Between 90 - 110 F

## Color Options

Black	Chrome	Gold
-------	--------	------

# Rhea

The Rhea features a refined, ladder-style silhouette with expansive, flat-profile rungs designed to maximize surface contact and heat distribution. Built for seamless integration into high-end architectural projects, its balanced proportions offer a clean, organized aesthetic for premium bathroom environments. This model is available in black, chrome, or gold to align with sophisticated hardware specifications.

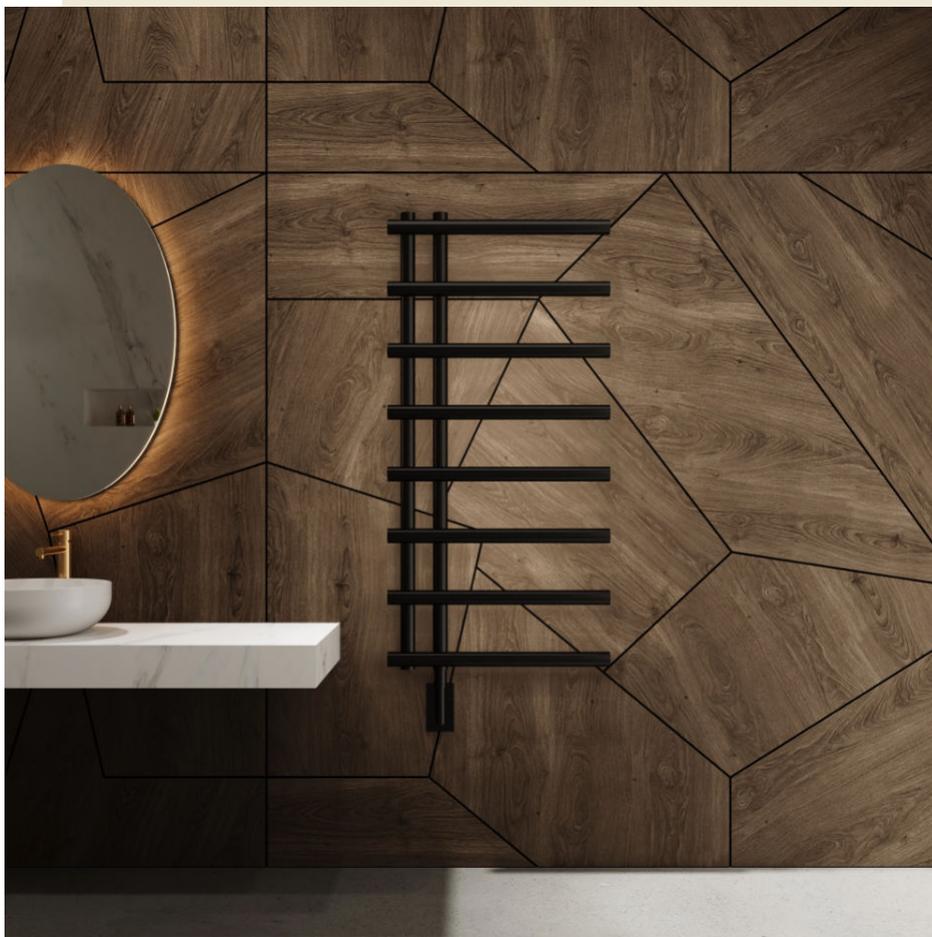

## Specifications

Dimensions	Heat Output	Power Requirement
55.12" x 23.6" x 3.46"	475 BTU	400 Watts

- ETL tested and compliant
- Hardwired connection (120 VAC) eliminates visible wires
- Max Surface Temp: Between 90 - 110 F

## Color Options

Black	Chrome	Gold
-------	--------	------

# Selene

The Selene features a distinctive, gentle outward curve that adds a soft architectural dimension to its high-density bar configuration. This model is engineered for premium specifications that require both a high towel capacity and a refined, ergonomic design. It is available in black, chrome, or gold to integrate seamlessly with sophisticated interior hardware.

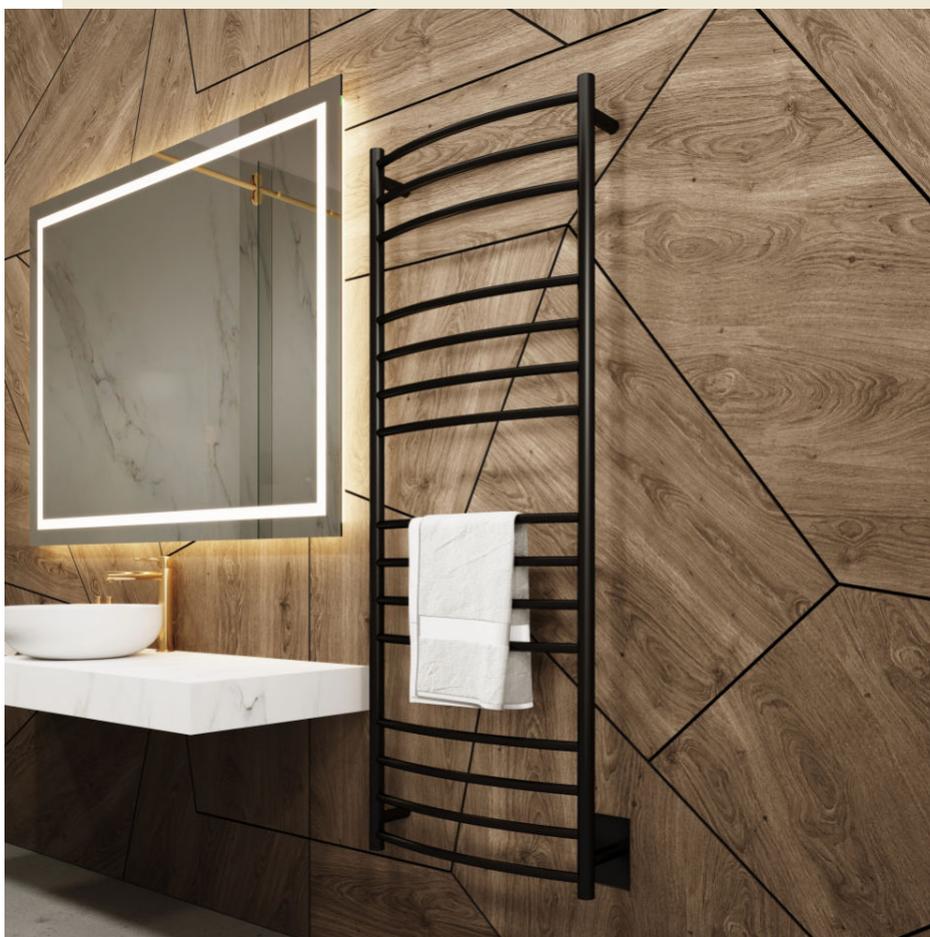

# Specifications

Dimensions	Heat Output	Power Requirement
59" x 24" x 5"	614 BTU	180 Watts

- ETL tested and compliant
- Hardwired connection (120 VAC) eliminates visible wires
- Max Surface Temp: Between 90 - 110 F

# Color Options

Black	Chrome	Gold
-------	--------	------

# Terra

The Terra towel warmer transforms a functional essential into a sculptural statement. Designed as a single vertical form with three upward-reaching branches, it brings a refined, architectural presence to the bathroom while delivering everyday comfort. Available in black or gold, Terra blends minimalist elegance with practical warmth—an understated yet striking addition to modern spaces.

## Specifications

Dimensions	Heat Output	Power Requirement
59" x 7" x 7"	232 BTU	70 Watts

- ETL tested and compliant
- Hardwired connection (120 VAC) eliminates visible wires
- Integrated on/off switch with indicator light
- Max Surface Temp: Between 90 - 110 F

## Color Options

Black	Gold
-------	------

# Themis

The Themis features a dynamic, segmented ladder design that provides prioritized drying zones for high-traffic bathroom environments. Engineered for durability and professional integration, its alternating rail clusters offer a sophisticated, functional silhouette that suits both high-end residential and commercial projects. This model is available in black or chrome to coordinate with modern architectural hardware.

## Specifications
